Below is a link from our tracking software that explains the process of tracking purchases from your promotions. One thing to be aware of is, as with any affiliate or referral partner software, it does not guarantee that it tracks 100% of the clicks. This is because some users will block cookies making the software unable to track. However, it also says that "the system can also track by IP address, if a tracking cookie is not found." We have enabled that feature so we can provide the most secure tracking possible.
